Abstract (en)

[origin: WO2021104624A1] The present invention relates to a device and to a method for determining, analytically and/or by sensing, the release of an active substance or a plurality of active substances from a release system. In particular, the present invention relates to a device and to a method for determining the release of an active substance or a plurality of active substances, in particular a fragrance or flavoring substance or a fragrance or aroma mixture, from a capsule or a precursor. The present invention further relates to a device and to a method for determining the properties of a release system, in particular a capsule or a precursor. Finally, the present invention relates to the use of the device according to the invention and of the method according to the invention to determine, analytically and/or by sensing, the release of an active substance or a plurality of active substances from a release system.
