Abstract (en)
[origin: WO2021107921A1] The present invention is directed to an apparatus for mixing two or more materials underground. The apparatus includes at least one hose in fluid communication with containers of the materials that are to be mixed. The apparatus further includes a mixer in which the at least one hose is terminated. The mixer has at least one aperture for receiving the at least one hose. The mixer further defines a mixing chamber in fluid communication with the at least one aperture to receive the materials entering into each aperture through each hose for facilitating mixing thereof in the mixing chamber. The mixer further includes an outlet for discharging the mixture.
