Abstract (en)

[origin: WO2021105317A1] The present invention relates to novel benzylamide derivatives of formula (I) to processes for the preparation of said compounds; to pharmaceutical compositions comprising said compounds and to said compounds for use in the treatment of pathological conditions or diseases that can improve by inhibition of transforming growth factor- β receptor I (TGF β RI)/ALK5, such as diseases and disorders associated to fibrotic conditions of gastrointestinal system, skin and eyes, to methods for the treatment and/or prevention of said diseases or pathological conditions and to combinations comprising said compounds and further comprising therapeutically effective amounts of other therapeutic agents useful for the treatment of said diseases or pathological conditions.
