Abstract (en)  
[origin: WO2021105603A1] The present invention relates to a two-component composition comprising: - a composition A comprising: - at least one reducing agent; - at least one (meth)acrylate monomer; - a composition B comprising: - at least one oxidising agent; and - optionally at least one (meth)acrylate monomer; the composition being characterised in that: - it comprises at least one radical photoinitiator in composition A and/or B; - it comprises at least one polymerisation inhibitor in an amount less than or equal to 0.3% by weight relative to the total weight of the composition.
