Abstract (en)
[origin: WO2021104691A1] The invention relates to a method for macerating a material to be conveyed, wherein the material to be conveyed is passed over a compression screw (2) and is macerated and compressed into a gas-tight and liquid-tight plug. The invention is characterised in that the degree of maceration of the material to be conveyed is controlled by a relative positioning of the screw (6) to the coil (8). The invention also relates to a device for carrying out said method and allows an optimal regulation of the maceration of the fibrous material.
