Abstract (en)
[origin: WO2021105098A1] The invention relates to a gutter system (1) with at least one frame unit (10), at least one cover unit (20) and at least one first damping element (14), wherein the frame unit (10) has at least one receiving area (12) for arranging the cover unit (20). The receiving area (12) of the frame unit (10) has at least three side walls (12.1; 12.2; 12.3; 12.4; 12.5), wherein the first damping element (14) is provided between the frame unit (10) and the cover unit (20) in such a way that the cover unit (20) is received in the frame unit (10) in a damping manner in at least three spatial directions.
