Abstract (en)  
[origin: WO2021105578A1] The invention relates to a lighting unit for a motor vehicle, the lighting unit comprising a support piece, a first mask (18) and a second mask (20). The first mask (18) and the second mask (10) are attached to the support piece by at least one elastic push-fit means (24) comprising a housing (26) with at least two parallel walls (28, 30) forming a gap between them and defining a female element. The housing is configured to retain, by elastic push-fitting, two fixing tabs (38, 40) which are superposed in the direction of the height of the gap and form male elements.
