Abstract (en)

[origin: WO2021025634A1] Invention relates to a support device (40) for a pan support of a gas hob comprising a retaining element (45) adapted to being fit at least one support arm (32) of a holding device (30) elevated at a vicinity of a burner (20) provided at a top plate (12) of a gas hob (10) in a surrounding manner wherein the support arm (32) is extending towards the burner (20) and a support element (42) at least partly surrounding the burner (20) from above such that hold a bulging exterior side (52) of a pan (50). The support device (40) further comprises a flat rim (421) extending in contact-free manner to an outer flame crown (25) and an inner flame crown (23) of the burner (20) in a predetermined rim angle (Y) across the top plate (12) through an elongation axis (A) between an outer periphery (41) and an inner edge (43) of the support element (42).
