Abstract (en)

[origin: WO2021102821A1] A method for generating an electronic document. The method is implemented by a peripheral device connected to a source device, and it comprises: obtaining, from said source device, a set of printing instructions formatted according to a print protocol, said set of printing instructions comprising printer command data and content payload data; extracting said content payload data from said set of printing instructions; generating an electronic document comprising said content payload data.
