Abstract (en)

[origin: WO2021104581A1] The present invention relates to a real control unit (5) for the simulation of a vehicle control unit (300) from a vehicle interior (1100), particularly of a military vehicle (1000), in a simulation chamber (200), with a position marking system (14) which can be captured by a 3D sensor system (7) for determining the position in the simulation chamber (200).
