Abstract (en)
[origin: WO2021104572A1] The invention relates to an electrical contact element (1) for transmitting high currents, wherein the electrical contact element (1) has a connection region (A) and a contact region (K), the connection region (A) having a cylindrical opening (2) and the contact region (K) having a cylindrical passage opening (3), the opening (2) and the passage opening (3) being oriented orthogonally relative to each other and a peripheral contact strip (4) being arranged within the cylindrical passage opening (3).
