Abstract (en)

[origin: WO2021105571A1] The invention relates to a method and a device for transmitting data for a vehicle, in particular in a V2X communication network. For this purpose, a data frame (2) is transmitted in a vehicle-to-everything (V2X) communication mode. The frame (2) advantageously comprises a series (200) of a plurality of identical and consecutive data packets (21 to 24) in the data frame, each packet (21 to 24) comprising the same set of identical data.
