Abstract (en)

[origin: EP4066720A1] The present invention relates to a dishwasher (1) comprising a body (2); a washing tub (3) that is disposed in the body (2) and wherein the washing process is performed; and a heat pump (7) which is arranged under the washing tub (3) and which has a first heat exchanger (4) enabling the water to be used in the washing step to be heated by drawing heat from the environment, a second heat exchanger (5) transferring the heat received from the first heat exchanger (4) to the washing water and a compressor (6) fluidly connected to the first heat exchanger (4) and the second heat exchanger (5) so as to realize the refrigerant cycle.
