Abstract (en)

[origin: WO2021110648A1] The present invention relates to the use of an extract of water-soluble saccharides from fruits of the date palm Phoenix dactylifera for protecting plants against pathogens. In particular, according to the invention, such an extract is used for stimulating the defense and resistance reactions of the plant for treatment or prevention, in particular in order to induce an activity that elicits the defense mechanisms.
