Abstract (en)

[origin: CA3160592A1] The invention relates to a tamper-evident package, in particular a child-proof package (10), comprising an outer package (11) and an inner package (12), wherein the inner package (12) is at least partially accommodated in the outer package (11), and wherein the inner package (12) is arranged so as to be displaceable in the outer package (12) for opening and closing the package (10), and wherein the package (10) has at least one securing means acting as a tamper-evident means in order to make it difficult or impossible to open the package or access the products located in the inner package (12). The invention is characterised in that the at least one securing means is effective between the inner package (12) and the outer package (11) in order to make it difficult or impossible to displace the inner package (12) in the outer package (11) for opening the package (10).
