Abstract (en)
[origin: WO2021110621A1] The invention relates to a hybrid system for use as an adhesive, coating or paint, characterized in that the hybrid system contains a) a reaction resin on the basis of α , β -unsaturated compounds, b) a reaction resin on the basis of CH-acidic methylene group-containing compounds and c) a primary amine. The invention also relates to related subject matter according to the invention.
