Abstract (en)

[origin: WO2021110206A1] The invention relates to a motor vehicle lock, in particular a motor vehicle door lock, which is equipped with a locking mechanism (1, 2) composed, essentially, of a rotary latch (1) and a pawl (2). Furthermore, a securing device (5, 6, 7, 8) and an emergency actuation element (9, 10, 11) for the securing device are realized. The securing device (5, 6, 7, 8) has at least one securing lever (5), which can be acted upon both by a first motor drive (7) and by an emergency actuation lever (10) as part of the emergency actuation element (9, 10, 11). According to the invention, the first securing lever (5) has a spring (5a) for positioning the first securing lever.
