Abstract (en)
[origin: WO2021110213A1] The invention relates to a closure, in particular a door closure, comprising a closure latch (7), which can be rotated back and forth between a locking position (V) and an unlocking position (E), a closure retainer (10), in which the closure latch (7) can engage in the locking position (V), and a stop (6), which limits the rotational motion of the closure latch (7), the stop (6) being a changeable stop that can be used in different stop receptacles (8, 9) in order to provide different stop positions (P1, P2).
