Abstract (en)  
[origin: WO2021113256A1] Systems and methods are provided for handling dynamic gathering, classification, accounting, and billing of metadata in a network of moving things. Specifically disclosed are systems and methods for managing accounting of metadata in a network node, accounting for the metadata based on a predefined accounting policy, and assessing, based on a predefined billing policy, cost for handling the metadata. The metadata can be handled based on the cost assessment.
