Abstract (en)

[origin: EP4070683A1] A containment structure, particularly for location and tracking devices, including at least two portions that can be coupled to each other in order to form at least one receptacle adapted to accommodate a location and tracking device, characterized in that the two portions can be opened in an open configuration that allows the insertion of a location and tracking device in the receptacle and the removal of the location and tracking device from the receptacle, and can be closed in a closed configuration in which the location and tracking device inserted in the receptacle cannot be removed from the containment structure.
