Abstract (en)  
The invention relates to a cab (4) for a heavy-duty vehicle (2), such as a bus or truck, whereby at least three display screens (6, 8, 10, 12, 14) are arranged inside the cab, each display screen having a display function, so that at least three different images, containing information for the driver, can be displayed, wherein all the screens are connected to one and the same communication network (24) so that any signal can be transmitted through the network to the display screens and, accordingly, the display function of each screen can be modified.
