Abstract (en)
There is disclosed a receptacle. In particular, there is disclosed a receptacle for household waste, for example a refuse bin such as a wheelie bin. The receptacle includes a body, the body being closed at a first end and open at an opposing second end, a wedge-shaped cross bar having an apex and a base, the wedge-shaped cross bar spanning the open end thereby defining a first and second opening; a first lid hingedly connected to the base of the wedge-shaped cross bar, the first lid being arranged to substantially close the first opening when the first lid is contiguous with a portion of the open end; and a second lid hingedly connected to the open end of the receptacle, the second lid being arranged to substantially close the second opening when the second lid is contiguous with a portion of the base of the wedge-shaped cross bar, and wherein the wedge-shaped cross bar is arranged such that the apex of the wedge-shaped cross bar is located in the body.
