Abstract (en)  
[origin: WO2021116070A1] Connector (1, 11, 21) for connecting a hose line (200) to an attachment element (100). The connector (1, 11, 21) comprises a housing (2) which has a coupling portion (21, 71, 81), wherein the coupling portion (21, 71, 81) is configured to be connectable to a complementary connection portion (121) of the attachment element (100) in an at least substantially fluid-tight manner. The connector (1, 11, 21) moreover comprises a hose attachment part (3) which is configured to be connectable on the one hand to a hose line (200) and on the other hand to the housing (2), in order to produce a fluidic connection between the hose line (3) and the coupling portion (21, 71, 81) of the housing (2). The housing (2) comprises at least one polyolefin.
