Abstract (en)

[origin: US2021178233A1] Embodiments of a golf club head with a textured strikeface and methods to form said club head through laser shock treatment are generally described herein. The golf club head can comprise a body and a strikeface. The strikeface has a textured front surface, with an array of indentions. Each indention can have a footprint area of between 0.01 μm^2 ($1 \times 10^{-8} \text{ mm}^2$) to 250,000 μm^2 (0.25 mm^2). The textured front surface can affect the spin imparted to a golf ball upon impact. Other embodiments may be described and claimed.
