Abstract (en)

[origin: WO2021117005A1] A spike device for a tracked vehicle, in particular a snow groomer vehicle, provided with at least one track having a longitudinal extent and comprising at least a plurality of transverse bars configured for acting against the ground during the movement of the tracked vehicle; the spike device comprising: a support configured for being coupled to one of the transverse bars; a spike supported by the support and configured for acting against the ground during the movement of the tracked vehicle; wherein the spike is supported by the support in a selectively releasable manner so that in case of breakage or damage the spike can be replaced without removing the support from the transverse bar.
