Abstract (en)
[origin: WO2021116255A1] The invention relates to a pack (11) for pourable contents, having an inner plastic container (13), which accommodates the contents and has a lateral wall (15), and having a base (17), which adjoins the lateral wall, and having an outer cardboard sheath (27), which is arranged on the lateral wall (15), wherein the sheath (27) is retained in a form-fitting manner on the lateral wall (15). At least one recessed grip (31) is formed on the lateral wall (15), the edge (33) of said recessed grip being designed such that at least part of it projects beyond the lateral surface (29). The sheath (27) is formed with at least one aperture (37), of which the dimensions correspond to the raised edge (33), as result of which, once the sheath (27) has been fitted onto the lateral wall (15), the aperture (37) can be latched with the edge (33) of the recessed grip (31).
