Abstract (en)

[origin: WO2021115834A1] The present invention relates to a cartridge (10) for a pressing device, comprising at least one elongated film bag (18) that is not inherently rigid, said film bag having a chamber (20) for receiving a compound (102) and a head part (12) for interacting with the film bag (18), wherein the film bag (18) has an opening on a side facing the head part (12), said opening being closed by a cover (14). The cover (14) has a predetermined breaking region (88). The invention further relates to a method for producing such a cartridge (10).
