Abstract (en)

[origin: WO2021115878A1] The present invention relates to a cartridge (10) for an applicator device, said cartridge comprising: at least one elongate film bag (18) which is not inherently rigid and which has a chamber (20) for receiving a compound (102); a head part (12) for interacting with the film bag (18); and an inherently rigid insert (16) which is connected to the film bag (18) on a side facing the head part (12) and which has a passage (60) sealed by a cover (14). The insert (16) has at least one vent opening (112) independent of the passage (60) and/or at least one vent slot (116) independent of the passage (60). Alternatively, the passage (60) of the insert (16) has at least one vent indentation (122) in a region facing the central axis of the film bag (18). The invention also relates to a method for manufacturing such a cartridge (10).
