Abstract (en)
[origin: EP3835197A1] A method for installing a line between first and second structures, comprising: reeling the line on a drum of an apparatus such that a first segment of the line is reeled in a first reeling direction, and a second segment of the line is reeled in a reverse reeling direction, the first segment comprising a first end of the line and the second segment comprising a second end of the line; connecting the first end of the reeled line to the first structure; moving the apparatus such that it gets closer to the second structure, and unreeling part of the first segment of the reeled line while the apparatus moves; and after the step of moving the apparatus and unreeling the part of the first segment, connecting a wire from the second structure to the second end of the line; pulling, from the second structure, the wire while connected to the second end of the line and simultaneously unreeling at least part of the second segment of the reeled line; and after the step of pulling the wire and unreeling the at least part of the second segment, disconnecting the second end of the line from the wire and connecting the second end of the line to the second structure.
