Abstract (en)

[origin: WO2021096445A1] The present invention relates to a novel process for manufacturing high performance cements, a novel grinding aid composition comprising an ester and/or ether polycarboxylate, to method for producing such composition and to use of such composition in the production of cement with or without other additives. The present invention provides a novel aqueous composition for use as grinding aid in the production of high-performance cement, wherein the composition comprises at least one polycarboxylate polymer and at least one surfactant.
