Abstract (en)

[origin: EP3835479A1] The invention relates to a garment care device 200 comprising a housing 201, a steam generator 202 arranged in the housing 201, an opening 203 arranged in the steam generator 202 for accessing an inside part of the steam generator 202, and a detachable plug 204 for closing the opening 203. The enclosure 205 comprises a first extremity E1 sealed to the opening 203, and a contact surface S1 adapted to contact with a portion P of said detachable plug 204 when the detachable plug 204 is closing the opening 203, for hermetically sealing the enclosure 205. A tube assembly 206 comprising a first end EE1 is fluidly connected to an inside area of the enclosure 205 and a second end EE2 opening outside the housing 201.
