Abstract (en)
[origin: WO2021118497A1] The present invention is particularly at least one frame (10) having at least one flap (20) wherein the solar panel is at least partially positioned. The improvement of the present invention is that the subject matter frame (10) comprises at least one carrier profile (50) which has a shape in a manner forming at least one panel gap (I) on said flap (20) in order to provide at least partial placement of the solar panel, at least one inner profile (40) positioned for forming at least one assembly gap (II) essentially at the lower vicinity of said carrier profile (50), and at least one outer profile (30) configured to encircle said inner profile (40) and said carrier profile (50) and to provide movement thereof together.
