Abstract (en)

A method and a machine (100) for making a product (1) of the tobacco industry. The method comprises the steps of:- forming a product (1) of the tobacco industry by wrapping a wrapper (2) around a tubular element (3) of the tobacco industry;- dispensing an adhesive fluid on the wrapper (2) and/or on the tubular element (3);- detecting the viscosity of the fluid before dispensing said fluid on the wrapper (2) and/or on the tubular element (3);- comparing the detected viscosity of the fluid with a reference value;- emitting an alarm signal if the detected viscosity of the fluid is different from the reference value.
