Abstract (en)
Composite four-sided wall panel comprising a pattern of full brick slips, which brick slips are glued in several rows to an insulating board, wherein both the pattern of the brick slips and the insulating board have the same corresponding shape and wherein at least two sides are rectilinear and the other two sides are stepped, wherein the insulating board has a thickness of at least 2 times the thickness of a brick slip, and wherein the insulating board is provided with a groove which groove extends along the entire circumference of the insulating board. The invention also relates to a plurality of one or more wall panels. Wherein these can be offered in a kit.
