Abstract (en)

[origin: WO2021123828A1] A cleaner head for a cleaning appliance, including: an agitator rotatable about an axis; a housing having a front side, a rear side, and first and second sides which extend between the front side and rear side, said housing further including a floor facing surface which extends between the front side, the rear side and the first and second sides and which, in use, faces a surface to be cleaned; wherein the housing defines a chamber which at least partially surrounds the agitator, the chamber having a dirty air inlet and a dirty air outlet; a wiper device which extends laterally between the first and second sides of the housing and which is positioned on or adjacent the floor facing surface of the housing; and a floor engaging device which extends laterally between the first and second sides of the housing and which is positioned on or adjacent the floor facing surface of the housing, said floor engaging device including an absorbent portion; wherein the wiper device and the floor engaging device are positioned rearwardly of the dirty air inlet.
