Abstract (en)
[origin: WO2021121995A1] Cleaning implement (1) comprising a mop-head plate (2) having a central element (3), which is connected in an articulated manner to a handle (4), and having a first pivot wing (5) and a second pivot wing (6), wherein the first pivot wing (5) and the second pivot wing (6) are attached in an articulated manner to the central element (3), and wherein the first pivot wing (5) and the second pivot wing (6) can be pivoted between a mopping position, in which the first pivot wing (5) butts against a first main side (7) of the central element (3) and the second pivot wing (6) butts against a second main side (8) of the central element (3), and a receiving position, in which the first pivot wing (5) and the second pivot wing (6) hang down from the central element (3), wherein the central element (3) is provided with locking means (9) in order to lock the first pivot wing (5) and the second pivot wing (6) in the mopping position, wherein form-fitting elements (11) for receiving a mop-head cover (12) in a form-fitting manner are arranged on the edges (10) of the first pivot wing (5) and second pivot wing (6), said edges being at a distance from the central element (3).
