Abstract (en)
[origin: WO2021122025A1] The invention relates to a dish rack (16) for a dishwasher (1), in particular a domestic dishwasher, said dishwasher having at least one at least one washing container (2). The dish rack is movably arranged in the washing container (2) and comprises a dish basket (13) and a storage surface (15) for holding items to be washed, which storage surface can be coupled to the dish basket (13). The storage surface (15) can be locked on the dish basket (13), and the storage surface can be pivoted about axis (C) into different angles of inclination (W.1; W.2; W.3) and also can be slid along the axis (C). At least one support element (18) is arranged on the underside of the storage surface (15), which support element supports the storage surface (15), at different angles of inclination (W.1; W.2; W.3), at a point spaced from the axis (C). The support element (18) arranged on the underside of the storage surface (15) has a number of locking steps (19.1, 19.2, 19.3), which come into engagement with the dish basket (13), whereby the storage surface (15) is supported at different angles of inclination (W.1; W.2; W.3).
