Abstract (en)

[origin: WO2021122980A1] The invention relates to a receiving unit (105) for receiving a fluid, wherein the receiving unit (105) has a receiving element (125) with a receiving face (130) and at least one micro-cavity (135) that is arranged and formed in the receiving element (125) on the receiving face (130) in order to receive the fluid. The receiving face (130) further has a hydrophilic surface characteristic in at least one subregion adjoining the at least one micro-cavity (135).
