Abstract (en)

[origin: WO2021122225A1] The invention relates to a method for operating a hand-held power tool (100), in particular a rotary impact driver, having a drive unit (111), a hand switch (128), a control unit (102) and a releasing operating mode for releasing a screw connection, in particular for releasing a fastening element from a fastening carrier, in which method a characteristic variable of the drive unit (121) is at least partially automatically controlled in an open-loop and/or closed-loop manner in the event of actuation.
