Abstract (en)
[origin: WO2021122350A1] The invention relates to a lighting element (100) for a vehicle. The lighting element (100) comprises a one-piece cladding element (101), which is at least partially splash-proof, and at least one lighting element (103). The at least one light element (103) is arranged on an inner side of the cladding element (100) and is configured to guide light beams through an outer side of the cladding element (101) opposite the inner side into an environment of the light element (100).
