Abstract (en)
[origin: WO2021123001A1] The invention relates to improving the structure of a steering wheel. According to the invention, a steering wheel has a monolithic steering wheel main body which comprises a central region for fastening the steering wheel to a steering mechanism, a steering wheel rim and at least one spoke, the first spoke end adjoining the central region and the second spoke end adjoining the steering wheel rim. In the region of the first spoke end (6) a projection (8) is formed which limits tilting of the spoke (5) towards the central region (3) to a predetermined extent.
