Abstract (en)  
[origin: CA3162135A1] The invention relates to a dispensing device (1), which is hand-held or integral, suitable for perforating and emptying a granular material contained in a vacuum package (P) comprising: - a tubular body (2) having a pipe (20) for the flow of the material, extending from an inlet opening (21), positioned at a first end of the tubular body, up to an outlet opening (22) for the granular material, positioned at a second end of the tubular body (2); - a hollow perforating tool (3) having a distal end terminated at a tip (30) and a broad base (31) at its proximal end secured to the body. The device also comprises a shoulder (4) acting as a stop configured to come into contact with the wall of the package to ensure that the dispensing device stops when said wall is perforated by the perforating tool (3).
