Abstract (en)
[origin: WO2021123236A1] An offshore vessel crane configured for mounting on an offshore vessel, for example for use in the handling of one or more offshore wind turbine components, e.g. for installation and/or maintenance of an offshore wind turbine. The crane comprises a base structure adapted to be mounted on the vessel and a revolving superstructure. The crane a boom that is pivotal up and down. The boom has an extensible boom structure that is slidably mounted between distal sections of the boom legs of a main boom structure, so as to be movable between a retracted position and an extended position in the direction of the length of the main boom section.
