Abstract (en)

[origin: WO2021123692A1] The invention relates to a composition comprising at least one (meth)acrylic monomer, optionally at least one (meth)acrylic copolymer, and at least one organic peroxide selected from among hemiperoxyacetals. The invention also relates to the use of said at least one organic peroxide for the polymerization of a composition comprising at least one acrylic monomer and optionally at least one acrylic copolymer, to the use of the composition of the invention for the production of resins, to a process for manufacturing thermoplastic, thermoset or composite parts, and to the parts obtained.
