Abstract (en)

[origin: WO2021122886A1] The invention relates to methods for cleaning and/or caring for an automatic dishwasher. In a normal cleaning cycle for cleaning items to be washed, in particular soiled dishes, a pre-portioned care agent for automatic dishwashers is metered automatically by an automatic dishwashing means, said agent being formulated separately from the dishwashing detergent. The care agent has an acid and/or a buffer system, which consists of at least one acid and at least one base, and at least one non-ionic surfactant. The care agent has at least two different components A and B, wherein component B has an acid made of i) and/or ii) and at least one non-ionic surfactant made of iii), and component A has at least one non-ionic surfactant made of iii) and/or at least one base made of ii).
