Abstract (en)  
[origin: WO2021122974A1] A method for removing lead from brass scrap, said method comprising: - subjecting brass scrap comprising alloyed copper, zinc and lead to heating under reduced pressure at a temperature above the boiling point of lead at the reduced pressure but below the melting point of the copper base of the brass scrap at the reduced pressure, to evaporate lead and zinc, and - recovering the evaporated lead and zinc by condensation.
