Abstract (en)

[origin: WO2021124192A1] A connection element (12) made of composite material comprises a bundle of fibres (13) and a binding agent, and comprises at least one preformed portion (14) and at least one free fibre portion (16, 18, 19). The at least one preformed portion (14) comprises a section of fibres (13) embedded in the binding agent to form a monolithic structure. At least part of the fibres (13) of the at least one free fibre portion (16, 18, 19) consists of virgin fibres (13).
