Abstract (en)

[origin: WO2021127194A1] The invention relates to a paver supporting apparatus and generally includes a support structure having support surface, a modular grid, and a plurality of pavers positioned on the modular grid. The modular grid is positioned on and secured to the support surface and includes a body, an extension extending from one side of the body, and a plurality of fastener receiving passageways positioned through the body and the extension.
