Abstract (en)
[origin: WO2021121883A1] Vehicle lock (100) comprising: a base plate (1) with a slot (10) suitable for receiving a striker (4), a catch (2) with a fastening seat (20) suitable for fastening the striker (4), a first spring (5) with an arm (50) that acts on said striker (4) and/or on said catch (2) in order to push the catch (2) towards an opening position, a pawl (3) suitable for locking the catch (2) in the closing position, a second spring (6) that pushes the pawl to a locking position, at least one Bowden cable (8) connected to the pawl. The catch (2) can be disposed in an intermediate closing position between said closing position and said opening position; and the pawl (3) can be disposed in an intermediate locking position, wherein the catch (2) is locked in the intermediate closing position.
