Abstract (en)

[origin: WO202119693A1] The invention relates to a guide assembly for guiding at least one moveable furniture part, preferably a sliding door or a folding sliding door, relative to at least one stationary furniture part, preferably a furniture wall, comprising at least one guide to be arranged on the at least one stationary furniture part, at least one guide device that can be moved relative to the at least one guide and can be connected to the at least one moveable furniture part, and at least one adjusting device for adjusting the at least one guide relative to the at least one stationary furniture part, wherein the at least one adjusting device comprises a mounting device that can be secured to the at least one stationary furniture part and at least one coupling device that can be coupled to at least one guide, wherein at least one, preferably rotatably mounted, actuation element is provided, with which the at least one coupling device can be adjusted relative to the mounting device, wherein at least one securing device is provided, with which the at least one guide device can be fixed in a secured position relative to the at least one guide, and wherein the at least one securing device has at least one securing body which is integrated into the at least one adjusting device.
